

FOR IMMEDIATE RELEASE

Rhapsody Strategies Opens Office in Calgary to Support Clients in Western Canada

OTTAWA, ON – October 28, 2014 – Rhapsody Strategies Inc., the Ottawa-based business accelerator officially opened the doors of its second location in Calgary today. The growing needs of business leaders looking for support in a complex, fast-paced market in western Canada prompted Rhapsody Strategies to establish a physical presence in Calgary.

The new office is headed by Steve Osmond, a Calgary business professional and coach. Osmond is the Regional Director of Western Canada and business coach for Rhapsody Strategies.

“Rhapsody Strategies is committed to helping business leaders across the country. We’re excited to deepen our presence in the west to better help those leaders on their path to success, say Eric Deschamps, General Manager and Lead Coach at Rhapsody Strategies. “Steve is the perfect man to lead the operation. He’s a seasoned business leader himself who made the transition to business coach and always works in the best interest of the client.”

Rhapsody Strategies works with leaders and companies who know they are meant for more, but have plateaued and don't know how to move forward to the heights they know they are capable of reaching. Rhapsody Strategies comes alongside with a plan and a team of experts to get organizations to the next level, from business coaching, consulting, branding and marketing, to engaging and growing their market. Having an office in Calgary gives western business leaders access to targeted one-on-one business expertise and support.

“Being a professional in Calgary myself, I made the transition to business coaching when I started recognizing the patterns and gaps in organizations that were limiting their growth,” says Osmond. “I’m passionate about seeing other professionals succeed, so I work with clients to set powerful goals and to execute the game plan.”

Rhapsody Strategies operates across Canada and the United States providing executives, business owners and professionals with a comprehensive set of services to help them achieve the objectives they have not been able to reach.
